PLASTIC SPARES FOR SPINNING INDUSTRIES

Complete Range of Ceramic Products for all types of Spinning Application

YARN DYEING SPARES & DYE SPRING

- Yarn Dyeing Carriers
- Fibre Dyeing Carriers
- Tops Dyeing Carriers
- Beam Dyeing Carriers
- Perforated Spindles
- Triangular Spindles
- Gravity Locks

- Double Locking Gravity Locks
- Gravity Lock with Spring
- Spacer Plates
- Triangle Spacers
- Top Plates
- Bottom Plates
- Dye Tubes

- Nut Locks
- Vim Nuts
- Pneumatic Press
- Loading and Unloading Baskets
- Dye Springs
- Repairing of Dye Springs

We are the pioneers of Dyeing Machine Carriers, Accessories & Dye Spring offering end to 50,000 over With Industries. dyeing fibre end products manufactured and supplied in India and World wide and an excellent sales and support network. We can orchestrate perfect spares for you anytime and anywhere.

FLYERS

Galaxy SYC Flyers: are made of special aluminium alloy, dynamically balanced. SYC flyers are superior in performance and balanced upto 1400 RPM.

Galaxy AC Flyers: Closed type AC flyers with high speed upto 1400 RPM, slotless construction with steel presser which allows uniform pressure through out the bobbin built-up.

Galaxy Suspended Flyers: These are made up of high speed special alloy with cast-in polished stainless steel tube. Very sturdy design for heavy duty production, use on all modern makes of roving frames at flyers speed upto 1600 RPM

FALSE TWISTER

A Flyer's performance depends as much on its own design as on accessories. Galaxy manufactures all major accessories related to flyers to ensure improved Productivity and increased life of the flyers. This leads to a consistent quality of roving. Galaxy makes wide range of false twisters moulded from Polyurethane and Rubber depending on the application. We also make Flyer Steel Tube cleaning to clean the tube. We offer highly quality bush & screw pins to provide free movement to the presser finger with minimal vibration. Screw pins are made of steel with very close tolerances for desired performance.

PRESSURES FINGER

Galaxy steel and aluminium pressers help in compact and uniform winding of the bobbin. The company makes pressers for all flyer models. Galaxy expertise is in manufacturing Wear-resistant, Electroless Nickel Plated (ENP) pressers to spin synthetic fibres. The plating enhances the life of the presser. The plating hardens the presser surface to 58 RWC, increasing the abrasion resistance against high-tensile and abrasive fibres. Galaxy recommends the use of its own pressers on its flyers. Besides getting best results from the presser assembly it also means that no dynamic rebalancing is required when our presser is replaced on our flyer.

BOBBIN HOLDERS

The universal Bobbin Holder from GALAXY are suitable for all type of Bobbins. It's lubricating bearing and improved trip mechanism give for superior performance & ensure performance longevity.

Salient Features

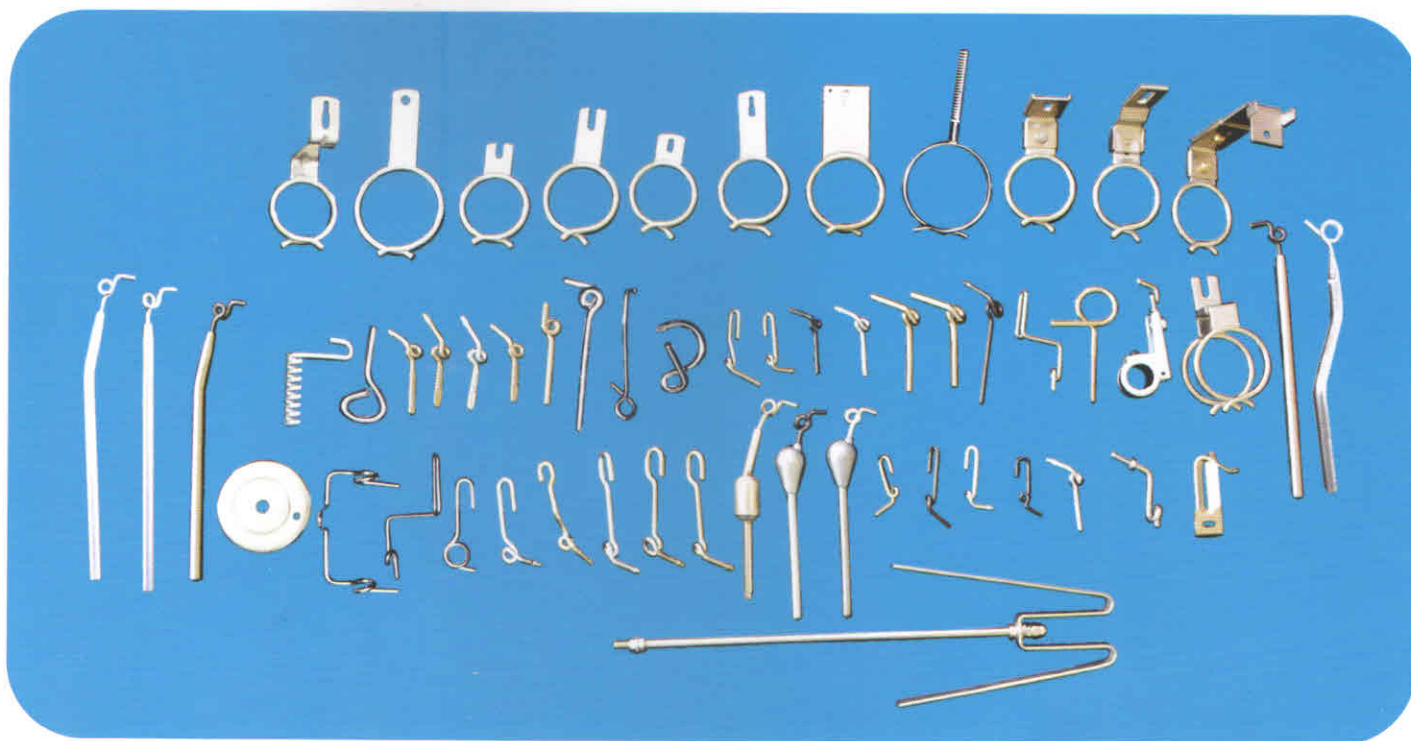

- Unbreakable body
- Breaking system
- Concealed bearing
- For protection against dust & fluff
- Suitable for all application :
Cotton, Synthetic, Wool, Special Yarn., etc.

FLOCKED CLEARER ROLLERS

We make Flocked Clearer roller over 100 sizes for a Ring Frames, Ring Doodles, Speed & Draw Frames, Combers etc. We can also make flocked rollers as per customize, customer's specification. Suitable for all machine like, LMW, RIETER, TOYODA, MARZOLI, SUSSEN, etc.

LAPPET HOOK, SNAIL WIRE & ABC RING

CONTACT ROLLERS, JOCKEY PULLEY & NEEDLE BEARING

We make all type of Contact Rollers, Tension & Jockey Pulley, Needle Bearing, & Bearing Cage for all type of Textile Machine like Rieter, Trutzchler, Zinser, LMW, Morzoli, Toyoda, Schalfhorst etc...
