

FIRST PREFERENCE TO
QUALITY & PERFORMANCE

Spinning Cans,
Aluminum truck & trolley

SLIVER CAN

Galaxy Started making Card Can in 2004 in Ahmedabad, India. In first 3 years of Operation, we sold Card Cans to more than 50 units in India .After successful installation and feedback from Indian Customer, we started exporting our cans from 2007 and Now Exports the same to more than 24 Countries Around the world.

Galaxy is rapidly good expanding and is one of the few companies in the world, to make Card Cans and All its accessories under one roof. We are also engaged in production of Various Spares and Machinery for Textile Weaving & Spinning Industry. Due to Our Experience in Designing of Spares and Machines for Textile, Galaxy Has many year of Experience in Design, Development, Manufacturing and Quality Control.

Competitive Price, Good After Sales Service, Stringent Quality Norms and Manufacturing Performance, Repeatability and Reliability are few of our company's guiding principle.

Mass Production of Card Can and Its Accessories, need Sound and In-house tool room. We are equipped with Precision CNC Machines for Milling, Spark Erosion, Wire Cut Operation, Surface Grinding ect. We have a group of Engineers Specializing in Tool Design using contemporary software tools.

SPINNING CAN

Galaxy Sliver Can Seamless Cylindrical Body are made from Virgin High Density Polyethylene Antistatic Sheets. Smooth finish of Can Body, prevent sliver damage from Rubbing. Virgin Quality HDPE Sheets ensure Cylindrical Integrity.

We make Can Body in Various Size, Thickness and Height. We can offer more then 25 Colors of Card Cans. We make Can Body Upto 1200 mm Diameter and 1500 mm in Height. Welding is Performed by Pneumatic PLC Controlled Machines, to ensure long life, smooth finish and perfect cylindrical shape.

We can also make can body as per customer requirement in different shapes.

TOP PLATE

Top Plate of the Spring is Designed to Give Perfect Holding of Spring and Allows more Sliver, Ensuring Zero Damage to Top Plate from Spring Pressure during Operation.

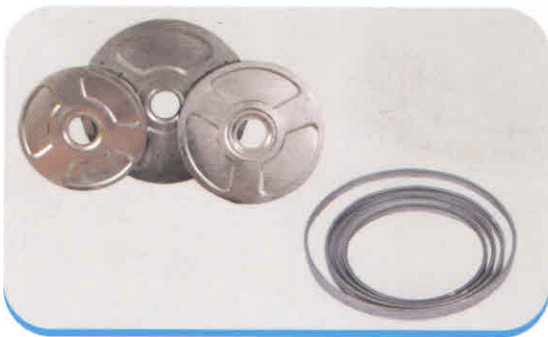

Top Plates are manufactured from Unbreakable Polymers and Galvanized Electro Steel with Anti slip surface. Top Plates have a friction Surface to Anchor the initial coil of sliver, preventing throw out. They are light, rigid and anti corrosive.

TOP RING

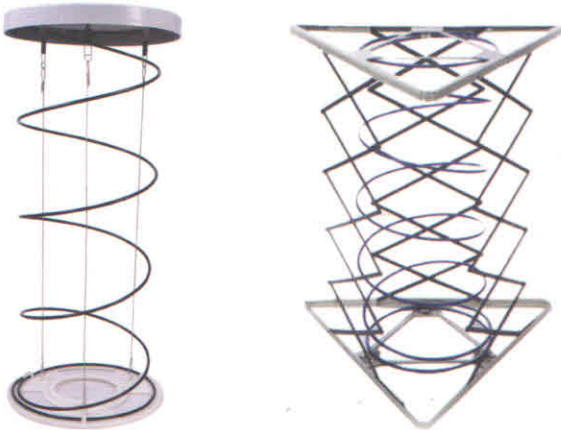

Top Rims and Bands are fitted on the top of Cylinder for Smooth and Perfect Round Shape. The Bands are swaged with Top Rims making the Top Strong and Robust, to hold the Can Firmly for Right Shape. Top Rims and Bands are available in both GI and Stainless Steel.

BOTTOM PLATES AND RIMS

Bottom Plates and Rims are made on Heavy Duty Power Press. G.I Bottom Plates embossed and Rims give support to Cans and Hold there Balance. Bottom Plates are supplied with Castor Fitting Arrangement. Bottom Rims are made from Superior Quality Steel. G.I Bottom Bands are provided to strength the bottom of the cans and are mainly used for Auto Doffing System. Bottom Bands are available in both G.I and Stainless Steel.

COILED / PANTOGRAPH SPRING

Galaxy Springs are manufactured from High Carbon Spring Steel on Fully Automatic Machines. The Heat Treatment is done with PLC Controlled Automatic Temperature Control Furnaces, to give Perfect Load and Pre Tension. Spring are Tested and supplied with Different load barring capacity as per customer requirement.

For Bigger Diameter Cans , Galaxy Recommends Spring with Stabilized Pantograph Structure. Pantograph Structure Springs allow higher load on springs with Zero Tilting and Smooth Uniform Doffing. GI Scissors action Electro welded Pantograph Structure (With Moulded Top Plates upto 600 mm and With GI Top Plates above 600 mm) and Spring ensure uniform movement and zero tilting of Top Plate.

CASTOR

We make Different Type of Castors. Specially Developed Dust Free Swivel Castors have pressed Zinc Steel Body with Thrust bearing for Swivel Movement and Axial ball bearing. High Impact Nylon (Also Polyurethane) wheel provide smooth and silent movement of the Card can. It is available in 60 mm and 80 mm size. We also make customized castors.

ALUMINIUM TRUCKS AND TROLLEY

- Trucks and Trolleys are offered both in Perforation and Non Perforation, Ribbed and Without Ribbed Aluminium Body.
- We make Trucks and Trolley in various size and can also make products as per customer specification.
- We use high quality Aluminium Alloy for Long Life and Durability.
- We can offers trucks and trolley with and without Pantograph.
- We make Castor wheels in various sizes and material. We can also make special size castor wheel on request.
- Special Anodized for Long Life.
- Special Wooden Pallets used for Packing, to Ensure Easy Transportation and Zero Breakages in Transit

Galaxy Offer wide range of Material Handling and Internal Transportation Solution. We make products for all specific requirement like Steaming, Doffing etc for Sliver, Bobbins, Cops, Yarns, Fabrics etc. Silent Features of our manufacturing.
